As you will be aware the movie night has been postponed. I will be getting Di to send around an email soon for everyone to vote on how to progress. Do we pick another movie and get it moving soon or wait for the original one, which is now November.

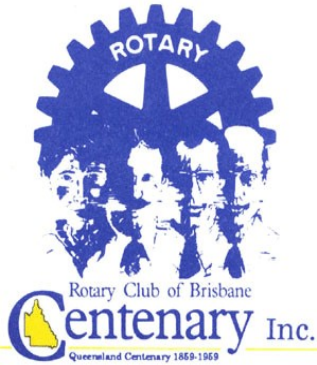

A big thanks to John for filling us in on the world of Marble Queensland.

We've this month. I'm sure we only scratched the surface and there is a lot more to see. Thanks again John.

We have a few things coming up in September and I will keep everyone up to date! Please make sure you put in your calenders the DG visit on the 22nd!

Thanks everyone. Have a good week

GUEST SPEAKER

John Woodward spoke about his marble mine in Chillagoe 2 hours from Cairns.

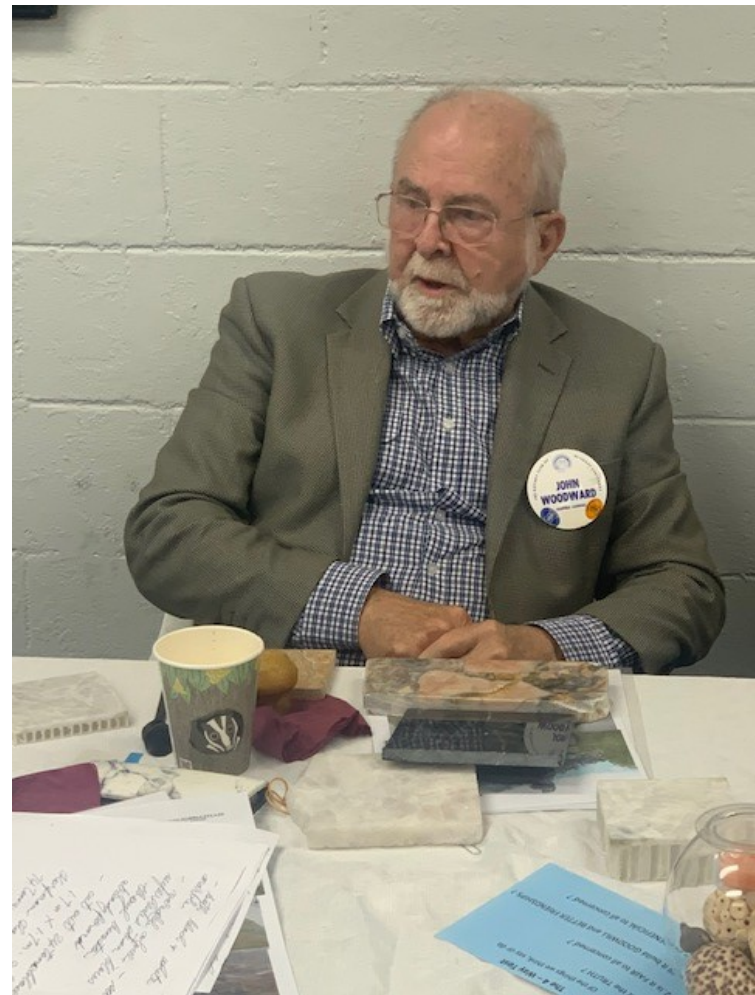

The mine is 1000 ft above sea level. The limestone beds from ancient coral reefs were later folded and uplifted far above sea level . The mine was formed 300 million years ago. The ground was torn apart by very powerful volcanic activity. Rising volcanic magma heated the limestone beds and crystallised them into marble. .

The marble there is of great complexity and beauty. See photos.

There is both black and white marble and also some marble of variable colours caused by superheated steam blowing through the limestone beds.

The marble is cut out in 24 tonne blocks 1.7 metres cubed.

It is cut with a Korfmann Chainsaw and lifted via a 74 tonne excavator.

FACES WITH 3 METRE BENCHES

SMILE!

Ran out of toilet paper and started using lettuce leaves. Today was just the tip of the iceberg, tomorrow remains to be seen!

If there's a baby boom nine months from now, what will happen in 2033? There will be a whole bunch of quaranteens!

The 4-way Test

Of the things we think, say or do

1. Is it the TRUTH?
2. Is it FAIR to all concerned?
3. Will it build GOODWILL and BETTER FRIENDSHIPS?
4. Will it be BENEFICIAL to all concerned?
